# MEZZANINE FLOORS

## MODULAR FLOOR

Mezzanine floor systems provides a practical solution for creating additional floor space in warehouses or shop floor areas without the need for warehouse expansion.

They are cost-effective, modular, and easy to install and dismantle. Our designs offer a range of flooring options tailored to specific applications, including metal grating, perforated decking planks, solid decking planks, chequered plates, cement composite boards, wood, plywood, and MDF.

### APPLICATIONS

Our Mezzanine designs, capable to accommodate load bearing capacities of up to 307.25 lb/sqft, can be utilized for a wide range of purposes, including storage, offices, assembly lines, production areas, or any other necessary operations.

### OPERATION

Our system design allows the use of trolleys and pallet trucks for material movement on each floor. Material flow between floors can be managed using a Vertical Reciprocating Conveyor (VRC), integrated conveyors or loading pallets on each floor using an MHE. Each floor is accessible to personnel via stairs.

### ADVANTAGES

- Modular by design
- Super adaptability
- Multi-functional purpose
- Maximum use of space
- Flexibility in storage
- Easy relocation
