METAL SHELVING RACKS

Heavy duty, high grade shelving units are easy to clean and will not rust or corrode. Shelving Units are 39"H or 75"H and are available in three different shelf sizes. Shelving has a smooth powder coat finish. 400 lb. shelf capacity

WIRE SHELVING SYSTEM

Wire shelving has become one of the most popular storage systems available to consumers and Industrial users alike. With storage capacities of 600-800 lb. per shelf, wire shelving can help organize any storage area.

The ever popular Chrome Wire Shelving System is perfect for any dry storage application. Chrome Wire Shelving is by far the most popular wire shelving style we offer due to its simple assembly without tools!

Green, Gray and Black Epoxy is a wonderful storage system that can be used in any wet or humid environment.

Stainless Steel Wire Shelving is the ultimate storage system for Laboratories, clean rooms, and hospital areas that have a rust or corrosion concern.

BOLTLESS RACK

Boltless Rack can build as a traditional shelving system, a high-rise installation, or a multi-tier system, whether operating standalone or manually-served picking or a large, fully-automated central store, it has a vast application in nature

Boltless Shelving is a flexible and versatile storage system for small-parts handling. Eliminating the need for cross-bracing maximizes storage for its depth.

Features:

- Frame components and shelves manufactured in MS as well as GI
- Based on the principle of a minimum number of components – for fast assembly and rebuild
- Extensive range of accessories

CANTILEVER RACK

The cantilever racking system is a manual versatile solution for storing long length materials such as pipes, tubes, bars, billets, commercial sections and more.

The cantilever racking system's simple design and minimal components make it easy to assemble and relocate as needed. It provides flexibility and easy accessibility for storing both small and large inventories, optimizing storage space and enhancing efficiency.

APPLICATIONS :

The cantilever arm storage system is well-suited for storing medium to high-weight goods in varying quantities per item, with a moderate throughput. This static system offers numerous advantages for manufacturing plants that handle pipes, tubes, bars, and commercial sections.

OPERATION :

Fork Lifts are used to store the material on the extended arm of Cantilever Rack. There are no limitations on the length of the materials that can be stored; the only*limiting factor is the material stability on fork arms while loading.

Features:

- Easy to install
- Adjustable levels as per requirement
- Rapid response to changes in product range
- Static racks can be easily upgraded to mobile racking
- Variable length of goods

WAREHOUSE IN HOUSTON, USA

MANUFACTURING FACILITY IN INDIA

CHOOSE IDI FOR YOUR PROCUREMENT NEEDS

At IDI, we offer a range of procurement solutions from Asia, including wholesale and contract manufacturing services for steel products used in homes, offices, and warehouses. Our focus on efficient storage solutions for moving goods

within warehouses is supported by our team of skilled engineers who ensure that all prototype samples meet US standards and grades. Choose IDI for your procurement needs, and let us be your second source of support.
